

Risk and reward

Saga Investments offers a choice of three ready-made investment portfolios designed by HUB Financial Solutions with Saga customers in mind.

This is the higher risk choice of the three investment portfolios. It aims for higher medium to long-term growth, but is more likely to have higher volatility along the way and a greater risk of loss. It may be suitable if investment growth over the medium to long term (at least five years) is a priority for you and you're willing to accept bigger ups and downs to try and achieve high returns.

Objective and strategy

The Adventurous Growth Portfolio invests in a selection of 'passive funds'. These funds are each designed to consistently track stock market indexes which helps keep costs low for customers.

The spread of funds gives you the opportunity to invest in a diverse range of assets like bonds and equities across UK and international markets. This helps the portfolio achieve its investment objectives and manages risks according to the selected approach.

The portfolio is 'rebalanced' every three months. This determines whether buying or selling funds is necessary to ensure the portfolio holdings stay close to its target fund mix.

Portfolio performance

Cumulative performance (%)	1 year	Since Inception
Adventurous Growth Portfolio	18.12%	38.35%

Key information

Data as at	31 March 2026
Initial Charge	£0
Total Fund Ongoing Charge	0.09%
Historic Yield	2.38%
Investment Risk Level	Adventurous
Portfolio Inception Date	29 August 2023

Income paid out from underlying funds is reinvested.

All underlying funds are authorised and regulated by the Financial Conduct Authority in the UK.

Risks

The value of investments may go up and down and you may get back less than you originally invested.

Past Performance is not a reliable indicator of future performance.

The value of your investment and income generated will be affected by changes in interest rates, currency exchange rates, social and political economic developments and general market conditions.

Performance figures based on performance of underlying holdings, rebalanced quarterly. These include fund charges and costs.

The Saga investment portfolios are designed by HUB Financial Solutions. Portfolios are designed to be self-selectable when accessed through the non-advised Saga Investments service and are only available to customers of the service. The portfolios are designed to be rebalanced in a pre-defined manner with no discretion. The rebalance will only arrange deals where at least a £10 holding in the fund is being bought or sold.

Investment volatility

1 year rebased in £ Sterling (%)	Volatility	Maximum Drawdown
Adventurous Growth Portfolio	10.19%	-7.07%

Volatility represents how wide 'standard' investment returns have been from the average.

Maximum drawdown is a measure of an asset's largest price drop from a peak to a trough.

Target fund mix

Fund	Allocation %
Legal & General All Stocks Gilt Index Trust C Inc	4.50%
Legal & General Sterling Corporate Bond Index C Inc	3.00%

Asia Pacific Emerging Equities	18.84%
International Equities	2.42%
Others	4.49%

Notes

This document is intended for use by customers of Saga Investments only.

The value of investments and income from them may go up and down, are not guaranteed and you may get back less than you invested.

The total fund ongoing charge shown is correct as at the date of this factsheet but may vary in future.

This does not include fund transaction costs.

Past performance is not a reliable indicator of future results. Indicative performance only, calculated net of management fees and fund costs. Platform Fees and Investment Service Fees should be taken into consideration.

All funds are denominated in UK Sterling but may hold assets in non-Sterling. As such the performance of the portfolio may be affected by fluctuations in currency exchange rates.

This investment portfolio is made up of funds which invest to track market indices. As such, the funds do not offer any ability to exclude investments based on environmental, social and governance (ESG) criteria.

This portfolio may not be appropriate for investors who may wish to withdraw their money in the short term.

For specific risks applying to the individual funds within the portfolio refer to the relevant fund Key Investor Information Documents (KIIDs).
